E-mail Ken at [chessclub@powerpawn.net](mailto:chessclub@powerpawn.net), or visit [www.powerpawn.net](http://www.powerpawn.net)

**Missouri News:** Missouri chess has had another awesome May, June, and July. The St. Louis Open, Chess Club Championship in Kansas City, and the Missouri Class Championships in Columbia produced fighting chess and the last two participants in the September Missouri Invitational round robin which will produce the 2006 Missouri State Champion at Bridger Middle School in Independence on September 16th-17th. The six players who have qualified for the 2006 Missouri Invitational are:

1. **Bob Holliman** - 2005 Missouri State Champion
2. **Kenneth Jones** - KC Masters Invitation Winner
3. **Tony Dutiel** - New Year Open Winner
4. **Ron Luther** - KC Open Winner
5. **Nick Karlow** - St. Louis Open Winner
6. **IM Michael Brooks** - Missouri Class Winner

MCA dues will increase in September 1st to \$12/\$8/\$5 dues to the increase in printing costs. The exciting scholastic news is that the National High School (K12) Championship will be coming to Crown Center in Kansas City from April 13 - 15, 2007. The MCA board created positive goals for the 2006-07 chess year spearheaded by Wayne Bartlett.

**Chess:** Chess coaches scold scholastic players throughout the world to castle in order to get Henry out of the center. Puzzle book after puzzle book illustrate the point with the tactical motif title, the "King in the Center". We all know that we should castle for King protection and to connect the rooks for development. The issue of course, is when and where? When I teach scholastic players, my rule is simple: try to castle within seven moves, if possible. Through experience, I have found that scholastic players who do not castle are in jeopardy of losing the game because the king becomes naked in the middle game. So I e-mailed Tim Steiner, a local Kansas City chess instructor, from [www.midwestchess.com](http://www.midwestchess.com) for his say on the issue. Tim's point is interesting. "Timing is very, very important. I generally do not recommend castling very early. I have seen kids castle into mate or a pawn storm too many times." The following is a game from The Chess Club G75 Wednesday tournament.

**Dutiel, Tony (1825) - Fee JR, Kenneth (1825) [E61], March G75 , March 8th, 2006**  
The game illustrates the consequences of not castling.

1.e4 c6 2.d4 d5 3.exd5 cxd5 4.c4 Nf6 5.Nc3 g6  
6.Bg5 Bg7 7.Nf3 0-0 8.Be2 dxc4 9.Bxc4 Bg4 10.h3  
Bxf3 11.Qxf3 Diagram

White' King is in the center while his d4 pawn and c4 bishop are unprotected. Black decides to sacrifice his b7 pawn and h8 rook even though in reality, White is sacrificing his king!

11...Qxd4 12.Bxf6 exf6 The idea here is to open the e file for the rook. 13.Qxb7 Greed! Qd5 is better. 13...Qxc4 Now, Henry is caught in the center. 14.Qxa8 Re8+ 15.Kd2 Bh6+ 16.Kc2 Re2+ Diagram

Mate in one! 0-1

Readers, please send me your comments and games on the topic of castling. The best comment or game will receive a free chess book. Letters to the editor are also welcome!

# MISSOURI CHESS ASSOCIATION BOARD OF DIRECTORS MEETING

## Minutes of May 21, 2006 Meeting

The meeting was convened at 2:08 pm at the UMC Memorial Union in Columbia, MO.

**Members present:** Ed Baur, Selden Trimble, Charlie Ward and Wayne Bartlett. **Absent:** Bob Holliman, Milton Garber, Bill Wright, Aaron Dubin and Ken Fee. In the absence of secretary Ken Fee Charlie Ward took the meeting minutes. This attendance did not constitute a quorum, so no official decisions could be made.

The minutes of the January 22, 2006 meeting were reviewed. It was agreed that there was no documentation in the minutes of the discussion and agreement to change for 2006 the determination of the Missouri state champion to the winner of a six-player invitational round-robin from the winner of the Missouri Open. Also, the terse description of the discussion regarding the state scholastic championship made it appear incorrectly that the Board had agreed to move the event to St. Louis or Kansas City. Ed Baur stated that he expected to continue running the event at its current location in Jefferson City through 2010. The minutes needed to be amended to make it clear that no change in location had been agreed to by the Board. Secretary Ken Fee was to be requested to produce a corrected version of the minutes including these two items. Inasmuch as the meeting had no quorum, formal approval of the amended minutes would have to be made at the next meeting of the Board.

The next meeting of the Board will be on Sunday, October 1 at 2:00pm in the UMC Memorial Union first-floor cafeteria.

Ed Baur presented a report from MCA treasurer Bill Wright. The MCA bank balance was \$3100.63 as of March 31, 2006. Subsequent to that date, the St. Louis Open had produced a profit of \$361.95, plus \$20.00 in USCF membership commissions.

Charlie Ward, membership chair, reported that there are currently 218 paid members, compared with 225 as of January 22. The number of members has continued a slow decline due primarily to a reduced number of MCA membership-required tournaments in St. Louis. Last month's St. Louis Open appears to be the only such tournament planned so far for 2006. Al Howlett no longer requires MCA membership in his tournaments due to the extra work involved at registration. We can expect upward bumps in membership due to major MCA events, such as the upcoming Missouri Class Championships and the Missouri Open in September, but the number of members over time should be expected to continue to lag until the St. Louis situation can be improved.

**Old Business:**

- **Tournament schedule:** Ed Baur verified that the Missouri Class is still planned for June 10-11 in Columbia and the Missouri Open for September 16-17 in Kansas City. Bill stated that the St. Louis Open will be planned for 2007; in view of the healthy profit realized this year, he will press for the event to be moved to a higher-quality (although likely more expensive) venue than the Sunset Hills Days Inn.

- The state scholastic championships were discussed. It was agreed that getting chess recognized by the state as an official interscholastic activity like athletics would give it a shot in the arm both from the publicity as well as financially. Ken Fee's proposal to seek a \$1 per player "this tournament only" MCA membership for officially sanctioned events would require the MCA to make a contribution to these events that would justify the fee. This contribution would have to be defined by future MCA Boards.

- It was clarified that it had been agreed at the January 22 meeting that the new MCA membership dues for memberships with a printed bulletin of \$12 for adults and \$8 for scholastic members would become effective on September 1.

### New Business:

- The format for determining the 2007 state championship was discussed. Prior to the meeting Ken Fee had suggested that the qualifying tournaments for an invitational round-robin be selected. Since there was no quorum at this meeting, it was not possible for such a decision to be made by the Board. In discussion, there was general agreement that each year the Board should agree on the format, venue and other details of the following year's championship with interested organizers. As a result, it would be most appropriate for the new Board taking office in September, 2006 to make the decisions regarding the 2007 championship. The schedule for potential qualifying tournaments would also be better known at that time. Also, everyone would have had experience with this year's new invitational format. Charlie Ward provided an outline for an invitational championship like the one to be used this year. This outline, provided as Attachment A to these minutes, will be put before the new Board at its first meeting this fall.

- Selden Trimble presented a series of comments under the general topic of Board member education; these comments are provided as Attachment B to these minutes.

The meeting was adjourned at 3:40pm.

Respectfully submitted,

Charles Ward

# THE CHESS CLUB CHAMPIONSHIP V

Kansas City, Missouri - April 28 - 29, 2006

**IM** Michael Brooks won the 2006 Club championship dethroning Ron Luther who had won the last four years. Brooks won on tiebreak after a hard fought draw with Expert Tim Steiner in the last round.

# TWO MORE PLAYERS EARN MISSOURI INVITATIONAL SPOTS

## (Will play for State Title)

**N**ick Karlow and IM Michael Brooks earn the last two spots in the six-player Missouri Invitational to be played at Bridger Middle School in Kansas City on September 16th-17th. Nick earned his spot by winning the sixty-two player St. Louis Open while Mike went 5-0 to win the Missouri Class in Columbia.

One of the reasons the Missouri Invitational was created was because players and organizers were tired and irritated about the many ties for the Missouri State title over the years. In 2006, an absolute Missouri State Champion will be crowned! Here is the tiebreak system.

**Missouri Tiebreak for Invitational:** The \$500 cash prize and title will not be split. The first tiebreak is based on wins. For example, if players A and B both have 4 points, the player with the most wins will be the Missouri State Champion. The second tiebreak is wins with Black. The final tiebreak for players who are tied after five rounds (wins and wins with Black) will be 5 0 blitz games until one player wins two games. Draws do not count. The player, who is ahead on USCF Tiebreaks, will play the first game with White. Players will rotate colors each game. If three players or more are tied, a four-round Swiss game 5 0 blitz tournament will result and the winner will be the Missouri State Champion.

## For the Championship of Missouri

Five Rounds - Round Robin G120  
September 16-17, 2006

NAME	Rating	State	1	2	3	4	5	6	Score

# CHess STRATEGY with Life Master Bob

## Tactics "Utter Crap"

Visit Bob's website: [www.chessmasterbob.com](http://www.chessmasterbob.com), E-mail Bob at [chessbob@ispwest.com](mailto:chessbob@ispwest.com)

Vasily Smyslov - Samuel Reshevsky [C82], USSR-USA Radio match, 1945

The comment has wrongly been made that "chess is 99% tactics." I do not recall the exact answer that World Champion Anatoly Karpov gave when presented with this observation but "utter crap" comes to mind. In fact, that response was given by GM Tony Miles when given a book to review. I won't mention the name of the author because I believe "utter crap" gives his database-in-print garbage a better reputation. So borrowing and/or misapplying Karpov's and Miles's reviews, I'll go with "utter crap" for my response to this ill phrased adage. Okay, you ask so what is chess (?) With apologies to Barry Manilow and all those involved in his music, I'll borrow a few lines, and since it's music, I'll just transpose: *I've been alive forever and I made the very first move. I put the pieces and the squares together; I am STRATEGY and I play the game.* The game under review was played by another World Champion, Vasily Smyslov who took the crown from non other than M. Botvinnik. (You know it's a sign of respect when you refer to someone by "first initial last name.") The other party to this crime is Samuel Reshevsky. 1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 Diagram

4.Ba4 Nf6 5.0-0 Nxe4 6.d4 b5 7.Bb3 d5  
8.dxe5 Be6 9.c3 Bc5 10.Nbd2 0-0 11.Bc2  
f5 Diagram

Active support of the Knight in the center of the board  
12.Nb3 Bb6 13.Nfd4 Nxd4  
14.Nxd4 Bxd4 15.cxd4 f4 Diagram

Black seeks active play and complications. This is an old plan. It is also important to observe the minor concession Black gave up for this type of play: White has the two bishops in exchange for Black having the initiative. 16.f3 Ng3 17.hxg3 fxg3 18.Qd3 A new wrinkle! The note shows the old line which has been known since 1906! - Duras-Maroczy, Ostende [18.Re1 Qh4 19.Be3 Bg4->] 18...Bf5 Diagram

Practically forced. The alternative is: [18...Qh4 19.Qxh7+ Qxh7 20.Bxh7+ Kxh7 21.Bd2 and Black gets a favorable ending. Given Smyslov's technique, this was probably not appealing at all to Reshevsky who

did not want to be on the receiving end of a "can-opener" — you know, the slow turning and cutting of the blade into the can, which eventually produces the goods. White would bring a Rook to c5, tying down the Black queenside, then pick up the pawn on g3, and then bring the King forward and begin a pawn avalanche on the kingside. Notice that in this process, he would dominate all sides of the board. Black's only play would rest in doubling rooks on the 'h' file - a process that would take 4-6 moves, and as I believe it was Fischer, who once said "6 moves in a chess game is an eternity." The back rank mate would easily be defended..Kf1, Be3/g1.] 19.Qxf5 Rxf5 20.Bxf5 Qh4 21.Bh3 Qxd4+ 22.Kh1 Qxe5 23.Bd2 Diagram

The Bishop must be developed and the Rooks united. Black has a massive pawn collection that could easily come rolling down the board. With this consideration, the "gift" of another pawn must be presented to Black. 23...Qxb2 [23...d4 24.Rfe1 Qd6 fighting to keep the White Bishop off the f4 square 25.Re6 Qc5 26.Rc1 Qd5 27.Re4 (27.Re7 Kh8 28.Rcxc7 Qxa2

29.Rxg7 Qb1+ 30.Bc1 Re8) 27...Kh8  
 28.Rxc7 Qxa2 29.Rxd4 Qxb2 30.Rdd7  
 Re8 31.Re7 Rd8 32.Be1 Qb1 33.Rc8  
 Rxc8 34.Bxc8 h6 35.Bxa6 b4 (35...Qd3  
 36.Bxg3+-) 36.Kg1 b3 37.Bf1 Qg6 38.Bc3  
 and my spider senses tell me that "White  
 is ok" he, he, White is winning] ...they had  
 diagonals and they had squares at the  
 copa, copacabana, the hottest diagonals  
 north of Havana **24.Bf4 c5** [24...d4 This  
 looks like a much better move. While  
 Black may not be able to employ his rook  
 right now, he would keep the White posi-  
 tion under wraps with the threat of c5, d3,  
 etc. 25.Rae1 d3 26.Bxc7 and White is still  
 coming out on top...perhaps Black is  
 already lost!] **25.Be6+ Kh8 26.Bxd5 Rd8**  
**27.Rad1 c4 28.Bxg3 c3** [28...Qxa2

Loal Davis (NM) - Edward Formanek (IM) [C16], World Open 2005 / French - Round (3)

1.e4 e6 2.d4 d5 3.Nc3 Bb4 4.e5 Ne7 5.Bd2 A rather simple move that

could transpose into a

Bogojulov line in the Winawer. It served to knock us both "out of book". [5.a3; 5.Nf3; and 5.Qg4 are all alternatives.] 5...Nf5 As my opponent had moved instantly with each move until this one (approximately 15 minutes), I concluded (perhaps erroneously) that he was out of book. [5...c5 6.Nb5 is the line favored by Bogojulov, recommended by Tarrasch - and later successfully played by Spassky and Karpov.]

6.Nf3 Nc6 This blockage of the c Pawn is often played by ambitious French players attempting to "take over" the board. 7.Bd3

Diagram

[I found out later that 7.Ne2 had been played before. We are now "officially" on

our own.] 7...0-0 [With 7...Nfxd4 8.Nxd4 Nxd4 9.Qg4 White nabs the g7 Pawn leaving Black's Kingside in ruins.] 8.Ne2 Nh4

Trying to stir up trouble. 9.Nxh4 Bxd2+

10.Qxd2 Qxh4 11.0-0 Bd7 The Queen Pawn is still immune - Bh7+ hangs the

Queen. 12.f4 f5 13.exf6 Qxf6 14.c3 Be8

15.Rae1 [15.Qc2 appears to prevent Black's next move, but I was primarily interested in "proving" Blacks plan of attacking the head of the Pawn chain erroneous by attempting to dominate the e file and laying pressure to the e5/e6 squares.]

15...Bg6 16.Bxg6 [With 16.Nc1 it would be nice if Black were to "feed" my plan of getting the Knight to e5 by exchanging. However 16...Bf5 protects e6 and a Bishop exchange on f5 would "round out"

Black's Pawns.] 16...Qxg6 17.Nc1 Rf6

18.Nd3 b6 [If 18...Raf8 then 19.Nc5 hits

b7 and threatens a fork on d7.] 19.Rf3

Re8 20.Qe2 Diagram

Yes - White's Queen was not doing anything. Here she eyes the e file squares,

g4/h5, and has visions of invading the Queenside (b5/a6) as well. **20...Re7 1.Rg3 Qe8 22.Re3 Nd8 23.g3** Freeing the Knight from a defensive chore. **23...Qb5 24.Nb4 Qxe2 25.R3xe2** I chose this recapture because I had a slight feeling (which did not materialize) that I might use the 'a' Pawn to open lines and more readily occupy that file with a Rook on e1. **25...c6** Covering the threat to d5 (e file pin). **26.Nd3 Rc7** Seeking counterplay. **27.Ne5 c5 28.dxc5 bxc5 29.c4** Although this gives a connected passed Pawn to Black - it is firmly blockaded and e6/c5 come under fire. Should Black not push, then White exchanges and after something like Ng4, penetrates to e7 and/ or e8. Black's perpetual problem is that he has three Pawn islands to watch over; White only two. This combined with the fact that White is doing the attacking, leaves Black a miserable defensive chore. **29...d4 30.Nd3** **Diagram**

Knights are beautiful blockaders. **30...Rc6 31.Re5 Nb7 32.g4** Black's King Rook has run out of squares. **32...h6** [32...Kf7 33.g5 Rg6 (33...Rf5 34.Rxf5+ exf5 35.Ne5+) 34.h4 threatening to snare the Rook with h5. 34...h5 35.f5 exf5 36.Re7+ wins the Knight.] **33.Kg2** Before

g5, White prevents Rf3. **33...Nd6** A desperate counter. [With 33...Kf7 34.g5 hxg5 35.fxg5 Rg6 36.Nf4 or h4/h5 and Black again runs out of squares.] **34.b3 Nf7 35.Rxc5 Rxc5 36.Nxc5 Rxf4 37.Kg3** Attack and defense. White is on e6 twice. **37...e5 38.Nd3** I love this square. **38...Rf6 39.Nxe5 Ra6** [39...Re6 40.Nd3 is no pin.] **40.Nxf7 Kxf7 41.Re2** This keeps the King cut off, protects the a2 Pawn, and prepares Kf3(4)/Ke4/Kd4(3). That effectively gives White two protected passed Pawns on the Queenside. [41.Rd1 also wins, but is not necessary.] **41...g5 42.h3** White prepares the journey to d4/d3 by avoiding Rf6+/Rf4+ and dropping the g Pawn. **42...Kg6** [42...Rf6 43.Rf2 is a winning King and Pawn ending for White.] **43.Kf3** OK - here we go. **43...h5 44.Ke4 Re6+ 45.Kd3 Rf6 46.Kxd4 Rf3 47.gxh5+** [My original plan when I embarked on Kf3 was 47.Re3 Rf4+ 48.Kd5 hxg4 49.hxg4 Rxg4 50.c5 and Black's Rook is poorly placed - having to scramble back to cover c8. With the assistance of the white King, Black would have to sacrifice his Rook. White's Rook is ever ready to sacrifice (if need be) for the g Pawn, leaving an easy King and Pawn ending (2 to 1) with the black King far away.] **47...Kxh5 48.Re3**

### Diagram

However this is stronger than my original plan. There is no passed Pawn for Black; White continues with the Queenside roller. Black "could" exchange Rooks and then win the h-Pawn followed by the promotion of the g-Pawn. Unfortunately this takes Black six moves. White Queens in four. 1-0

**Bakker (X) - Loal Davis (NM) [C26] World Open 2005 / Bishops Opening -Round (9)**

1.e4 e5 2.Nc3 Nf6 3.Bc4 c6 My opponent took a full 35 minutes on his next move. Because of the rapid execution of his first three moves and then "the grand pause", I suspected that his opening sequence was steering towards a King's Gambit Declined and he would have been more comfortable with Nc6 and/ or Bc5. 4.Qe2 [4.Qf3 is supposed to be "the" book move.] 4...Bc5 [I almost (seriously) played 4...d5 5.exd5 Bd6 when the "normal" Elephant Gambit is enhanced by the poor placement of White's Queen. I couldn't be certain if I was really seeing compensation or was punchy from the fact that this was the last round of the tournament - Oh well - I chickened out.] 5.f4 My original suspicions back on move three were confirmed with this thrust. [5.Bxf7+ Kxf7 6.Qc4+ d5 7.Qxc5 Na6 8.Qa3 and Black recovers the Pawn with a misplaced white Queen.] 5...d5 I had a time advantage of approximately 45 minutes at this point and spent some time on this counter. 6.Bb3 [With 6.exd5 0-0 White is about to get smashed on the open central lines. and 6.fxex5 Ng4 drops material.] 6...0-0 Clocks at this point had 1:26 left for me (to move 40) and for White 0:53. 7.fxex5 Bg4 8.Nf3 Nfd7 9.d3 [Once again 9.exd5 Nxe5 White cannot withstand the central air applied to his

King and Queen.] 9...Nxe5 10.Bf4 Bd6 Tactics directed against the f4 Bishop.

11.Be3 Attempting to cover a Queen check on h4. 11...Bb4 Pin, busted Queenside Pawns, and a fork are all on the menu. 12.Bd2 d4 13.Nb1 Bd6 Leaving White the problem of how to unscramble his pieces. 14.Qf2 a5 [If I wanted to "force" the coming tactical sequence, then 14...Bxf3 would have moved in that direction as it doesn't allow White to play Ne5.] 15.a3 [15.Nxe5 Bxe5 would have slightly changed the character of the game. Although 16.0-0 would strike at f7 a third time, once defended (say Qe7), then White still has to solve the problem of his Bishop on b3 coupled with the lack of harmony and difficult development of the Queenside.] 15...Bxf3 Diagram

In preparation for the following sequence, this exchange (closing the f file) does not allow White to pressure f7. 16.gxf3 Qb6 Secondary threat - a4 - and Qb2 with a complete rupture of the Queenside.

17.Bc1 Diagram

17...Qxb3 Primary threat - wins a Pawn, exchanges Queens, cripples the Queenside Pawns, and enters an ending with virtually no resistance. 18.cxb3 Nxd3+ 19.Kf1 Nxf2 20.Kxf2 f5 No shelter for Mister King. 21.Nd2 Bf4 This threat to e4 does not allow White time to find a Knight outpost. 22.exf5 Bxd2 23.Bxd2 Nd7 The f Pawn is not going anywhere. 24.Rae1 Nc5 [Also 24...Rxf5 25.Re7 Rf7 26.Rhe1 Kf8 is simple.] 25.Re7 Nxb3 [Once again 25...Rf7 is a very simple ending with White in fragments and multiple targets all over the board.] 26.Bf4 Rxf5 27.Rxb7 Nc5 28.Rb8+ Rxb8 29.Bxb8 Nd3+ This move (my focus back on move 25) enters a juicy ending for Black with two connected passed Pawns still coupled with isolated targets. 30.Ke2 Nxb2 31.f4 Trying to manufacture some sort of post for the Bishop on e5. [I had expected something like 31.Rc1 c5 32.Ba7 d3+ (32...Na4 33.Rc4 Nc3+ 34.Kf2 Kf7 35.Kg3 (35.Bxc5 Ne4+) 35...Ke6 36.Rxc5 Rxc5 37.Bxc5 Kd5 38.Be7 d3 39.Bg5 Nb1 40.Kf2 Nxa3) 33.Kd2 Rg5] 31...c5 [As White has not taken the c file, another way was 31...d3+ 32.Kd2 Rc5] 32.Rc1 Na4 [Or 32...Rh5] 33.Be5 Nc3+ 34.Kd3 Kf7 35.Rc2 g5 Diagram

0-1

Bob Jacobs (2100) - Loal Davis (2202) [C55], St. Louis Open 2005 / Max Lange Round (5)

1.e4 e5 2.Bc4 Nf6 3.d4 exd4 4.Nf3 Nc6 5.0-0 Bc5 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5 10.Nc3 Qf5 11.Nce4 0-0 12.g4 The last round of the tournament; he offered a draw here. 12...Qe5 13.fxg7 Rhg8 14.Nxe6 fxe6 15.Bh6 Be7 Diagram

[The Marshall Capablanca match in 1910 (after Marshall's win over Tarrash in Hamburg) had Capa playing 15...d3 16.c3

Be7 He may well be correct, but I've taken to keeping the Pawns back - possibly saving my options.] **16.Ng5** I've only had two tournament games (this is the second) where this was played. Bob wrote this down quickly before contemplating whether he would play it or not. It seems obvious, yet I'm not convinced at all that it's correct. [16.f4 Qd5 was played in the Marshall/ Capablanca Max Lange exhibition match in 1910 (a drawn match) with the exception that the black Pawn was on d3 and the white Pawn on c3.] **16...Qd5**

**17.Nf7** [17.Nxe6 This was played in one of my games in Connecticut (Foxwoods). I was winning (but lost) that game; wasn't very happy about the result, but learned something about this position. 17...Rd6 18.Qe2 (With 18.Nf4 Qf7 everything is hanging.) 18...d3 19.Qe4 d2 (At Foxwoods I played 19...Qxe4 20.Rxe4 dxc2 which still wins, but required two to three more big mistakes to finally lose a long ending.) 20.Qxh7 (20.Bxd2 Qxe4 21.Rxe4 Rxd2) 20...dxe1Q+ 21.Rxe1 Rdd8 22.Nxd8 Rxd8 The sad part of the story is that I saw this position "clearly" before deciding to exchange Queens earlier. In retrospect -

not very difficult. Black has Bf6/Ne5/Nf3 or Qf7/Rg8/ Bf6 - and as in the Capa/ Marsh games, the Knight maneuvers via d8 to f7 - or perhaps in this game a Ne6. Anyway, it can't be all that difficult to want to enter a late middlegame up a piece.] **17...Rd7**  
**18.g5 Bb4** A horse is loose. **19.Qh5 Bxe1**  
**20.Rxe1 e5 21.Nh8** White's pieces have either volunteered or effectively been pushed out of the center. **21...e4 22.Qg4 Ne5** Diagram

My best game of the tournament. 0-1

### Harry Nelson Pillsbury Tournament Rescheduled!

**Note:** In a prior issue of the MCB, we indicated that the Harry Nelson Pillsbury Open was scheduled for June 24, 2006, in Columbia, MO. That date, though accurate when we published the Spring issue, has since been rescheduled for **August 19, 2006**. The MCB invites you all to play in the tournament on August 19.

# PSYCHOLOGY IN CHESS

by Tony Rich

It is important in a tournament game to use every advantage available in order to produce the desired result. Many people choose openings that they feel are the strongest and provide them with the most winning opportunities. In addition, most tournament goers will, at one point or another, spend time reviewing middle game tactics and endgame scenarios. Studying each of these phases in a game is paramount to a strong performance. However, there is one aspect that is equally important, and is usually overlooked: psychology.

The psychological aspects can be equally as important in deciding the outcome of the game as the chosen moves. In his book, "Becoming a Grandmaster", Raymond Keene said "Games like [Penrose-Botvinnik] impressed on me that 'wanting to win' was perhaps more important than playing good moves." Chess psychology can be broken down in to its constituent parts. First of all, there is the inner battle one must master. A French proverb says "You cannot play at chess if you are kind-hearted." This may sound harsh, but it does point out the fact that a desire to win a game will often inspire and drive a player to dig deeply in to a position and find the best moves.

Bobby Fischer was a good example of this type of player; he was interested only in winning. His attention did not wane; he did not get cold feet. Instead, he attacked the position and his opponent with ferocity and often came out the victor. It is this will to win, or fighting spirit, that differentiates the upper echelon of chess players from the rest of us;

where you or I may get discouraged or feel nervous, they hunker down and slug it out. It takes a lot of chutzpah to play for a win when you are intimidated, either by your opponent, or the situation over the board. Conquering this inner fear will certainly improve your results. Even the great Mikhail Tal faced his own nerves at one point or another. He is quoted as saying, "Later, I began to succeed in decisive games. Perhaps because I realized a very simple truth: not only was I worried, but also my opponent."

In addition to this fighting spirit that one must possess, there is another, perhaps more important psychological battle: you versus your opponent. Lasker was probably the finest example of a master who played his opponent at least as much as he played the position. He often used psychology over the board to influence the game. From Richard Reti's "Masters of the Chessboard": "For him the essential element is this contest of nerves; he uses the medium of the chess game to fight above all his opponent's psyche, and he knows how to bring about the nervous collapse, which, otherwise, occurs only after a mistake, even before a mistake has been made and to make this the very cause for subsequent errors... All of a sudden Lasker begins to play magnificently and to show his real strength. The opponent's nervous collapse and shattered morale finally results in a catastrophe at the chessboard." Strong masters will often make, perhaps not the objectively best move, but the move that poses the most problems for an opponent. A fine example of this is the second game of the match between Tarrasch and Lasker in 1908.

Tarrasch - Lasker  
1908 World Championship Match

In the diagrammed position, Lasker has made a few passive moves, leaving Tarrasch with the better of the opening. However, Lasker made a good psychological decision and decided to play 1...Ng4 leaving his opponent with the arduous task of finding the best reply. Tarrasch was obviously thrown off his game.

Play continued 2.Bxg7 Nxf2! 3.Kxf2 In the book "Emanuel Lasker, The Life of a Chess Master", Dr. Hannak says, "Instead of winning the [pawn on f2], Tarrasch, by [3. Qd4] could have gone in for a very strong and probably irresistible attack. Against an attacking player Lasker would almost certainly have lost this game; but then, against an attacking player Lasker, the psychologist just would not have played [1... Ng4]." The game concluded:

3...Kxg7 4.Nf5+ Kh8 5.Qd4+ f6 6.Qxa7 Bf8  
7.Qd4 Re5 8.Rad1 Rde8 9.Qc3 Qf7 10.Ng3  
Bh6 11.Qf3 d5 12.exd5 Be3+ 13.Kf1 cxd5  
14.Rd3 Qe6 15.Re2 f5 16.Rd1 f4 17.Nh1 d4  
18.Nf2 Qa6 19.Nd3 Rg5 20.Ra1 Qh6 21.Ke1  
Qxh2 22.Kd1 Qg1+ 23.Ne1 Rge5 24.Qc6  
R5e6 25.Qxc7 R8e7 26.Qd8+ Kg7 27.a4 f3  
28.gxf3 Bg5 Diagram

Resigns. To give you an idea how powerful psychology can be in chess, look at the Fischer-Spassky match in 1972. Now, I'm not advocating the use of infantile tactics like Fischer used against opponents, but I am interested in the effect they had. Going in to this match, Fischer's score against Spassky was -3 (0 wins, 2 draws, and 3 losses), making Spassky the favorite. However, Fischer made one demand after another. He demanded an increase in the prize fund after the official opening ceremony (which he did not attend). He protested television cameras after losing the first game, and refused to show up for the second game all together. This put Fischer at a lifetime record of -5 against Spassky going in to the third round. However, all of the emotional turmoil took its toll on Spassky. He went down in a series of mishaps; he wasn't the person he was before the match. It is important to realize that sportsmanship and ethics are very important. It is only appropriate to use psychology in your move selection and mental preparation. Bobby Fischer's behavior is appalling, and he is suffering the consequences of his actions. I'd like to leave you with an example of psychological play. Tony Miles was known for outlandish openings and psychological chess. The most notable

example is when he beat Karpov in the following game.

**Karpov,Anotoly - Miles,Tony [B00]  
European Championships, 1980**

The notes to this game are those of Tony Miles, edited by Raymond Keene. I have removed comments that don't pertain to the psychological battle over the board.

**1.e4 a6** After a few moments hesitation. I watched Karpov's face as he returned to the board - there was no reaction at all. The audience, though, was another matter. Conditions for spectators were not wonderful so at first only a few noticed, but after some nudging and pointing a general hushed sniggering broke out. [...] I tried to look serious. **2.d4 b5 3.Nf3 Bb7 4.Bd3 Nf6 5.Qe2 e6 6.a4 c5** Diagram

A sharp reaction, but the natural **6...b4** is quite a reasonable alternative. Note that White was threatening to win a pawn by **7 e5**. The text still offers the pawn, but only in return for the bishop pair and an initiative. While playing **...c5** I felt sure Karpov would avoid such tactical lines. **7.dxc5 Bxc5 8.Nbd2 b4 9.e5 Nd5 10.Ne4 Be7 11.0-0 Nc6 12.Bd2 Qc7 13.c4** Diagram

As expected, still playing quiet moves. The only alternative to defend the [e]-pawn was **13 Ng3** when Black could either challenge in the centre with **...d6** (simplest) or **...f6** (sharper), or as his king is still uncommitted, even consider **...h5!?**. **13...bxc3 14.Nxc3 Nxc3 15.Bxc3 Nb4 16.Bxb4 Bxb4 17.Rac1 Qb6 18.Be4 0-0 19.Ng5** Diagram

After half an hour's thought. **19 Bxh7+** was interesting - though again I was sure that Karpov wouldn't play it! On **19...Kxh7 20 Ng5+** of course not **20...Kg8??** because of **21 Qh5**, but **20...Kh6** also fails to **21 Rc4!** threatening **Rh4+** and if **21...g6 22 Qg4** and Black loses the B(b4). Correct is

20...Kg6 and if 21 Qg4 either 21...f5 22 Qg3 (22 exf6 Kxf6) 22...Qd4!? to block on g4 (23 h3? Kh5! winning) or even 21...f6!?. Afterwards it was established that 19 Bxh7+ is quite dangerous but Miles was confident that Karpov would regard it as speculative and avoid it. The commencement of an artificial manoeuvre which ultimately loses the game for White. The simple 19 Bxb7 Qxb7 20 Rfd1 is perfectly adequate for equality 19...h6 20.Bh7+ Distinctly artificial. I expected 20 Bxb7 Qxb7 21 Qe4 though Black is certainly not worse in the resulting ending. I suspect the text was rather due to the psychological effect of 1...a6. Karpov, having got nowhere from the opening, felt he should be doing something forceful. This is too optimistic and White should prefer the simple 20 Bxb7. 20...Kh8 21.Bb1 Be7 22.Ne4 Rac8 23.Qd3 Rxc1 24.Rxc1 Qxb2 25.Re1 Qxe5 26.Qxd7 Bb4 27.Re3 Qd5 28.Qxd5 Bxd5 29.Nc3 Rc8 30.Ne2 g5 31.h4 Kg7 32.hxg5 hxg5 33.Bd3 a5 34.Rg3 Kf6 35.Rg4 Bd6 36.Kf1 Be5 37.Ke1 Rh8 38.f4 gxf4 39.Nxf4 Bc6 40.Ne2 Rh1+ 41.Kd2 Rh2 42.g3 Bf3 43.Rg8 Rg2 44.Ke1 Bxe2 45.Bxe2 Rxxg3 46.Ra8 Diagram

I now sealed 46...Bc7 but Karpov resigned without resumption.

### About Tony Rich:

Tony Rich graduated in May of 2005 from the University of Missouri - Rolla with a BS in Computer Science. He is a Network Engineer and security professional, working in St. Louis, Missouri. In addition to writing chess articles, he contributes technical articles to various sources and has functioned as the editor of the Missouri Chess Bulletin. You can find out more about him and find other articles at <[www.tonyrich.org](http://www.tonyrich.org)>. # SPOTLIGHT ON MISSOURI CHESS: THOMAS GOSSELL

by Steve Goldberg, e-mail: [scholasticchess@hotmail.com](mailto:scholasticchess@hotmail.com)

In the Spring 2006 Missouri Chess Bulletin, Thomas Gossell is listed as the third-ranked chess player in Missouri (USCF 2213), one of only six

Missourians rated 2200+. The eighteen-year-old was born in McPherson, Kansas, but has spent the last ten years in Lee's Summit, Missouri. He just graduated from his high school class of one (he was homeschooled) and plans on staying in Missouri. In the fall he will be attending Central Missouri State University, majoring in actuarial science.

Gossell learned to play chess at age four and in the first grade he began tournament play. By age ten, he started participating in national scholastic and open tournaments. One of his highlights came at the 2001 North American Open, where he entered the tournament rated 1745 but had a performance rating above 2200 and gained over 150 points!

In 2002, he finished in second place at the National Junior High Championship. 2004 brought more fireworks for him, tying for first place in the Governor's Cup tournament and having the exhilaration of defeating his first GM (see the game below). In 2005 he tied for first in both the Missouri Open and the National High School Championship

tournament and was recently named as one of seven recipients of the 2006 Scholar Chessplayer Outstanding Achievement Awards, presented annually by the U.S. Chess Federation and the U.S. Chess Trust. He also was honored with winning a 2006 National Merit Scholarship for his academic excellence.

As for his chess training regimen, he typically devotes 20-25 hours weekly, spent playing on the Internet Chess Club (ICC), working on his opening play (with Fritz software as a valued assistant), reading chess books, and keeping up with chess news and events via the internet. "As a class player," he states, "I greatly benefited from studying Jeremy Silman's books, especially

*How to Reassess Your Chess*, which taught me how to examine a chess position. Right now I am learning from Jacob Aagaard's *Excelling at Technical Chess*."

Currently rated 2228 USCF (2237 FIDE), I asked Thomas if there is anything in particular for which he attributes his chess success. "Having a supportive family has helped," he said, "and being homeschooled has given me more time to

put into chess. But there is no substitute for hard work, which is the main reason I have reached master level." His recommendations to others trying to improve? "At the lower scholastic levels, chess is almost all

A supportive family and a strong commitment to chess training has made Thomas Gossell one of the top young players in Missouri.

tactics. So the best way for kids rated less than 1000 to improve is to expose themselves to a lot of tactical ideas. Ways to do this include studying tactics books and just playing a lot of chess. Maybe even some bughouse every once in a while could be helpful. As kids progress up to higher levels, they should start to learn about imbalances and how they affect the game." This sounds like good advice to players of all ages.

Thomas was kind enough to share with us his 2004 Governor's Cup victory over GM Yuri Shulman, including his extensive and illuminating annotations. Enjoy!

**GM Yuri Shulman - Thomas Gossell [A52], Governor's Cup Lee's Summit (1), 29.10.2004** (annotated by Thomas Gossell)

1.d4 Nf6 2.c4 e5 3.dxe5 Ng4 4.Bf4 Bb4+ 5.Nd2 d6 6.exd6 Qf6 7.Nh3 Nxf2 8.Nxf2 [8.Kxf2 Bxh3 9.g3 is considered to be the critical line, when the game can become very complicated. Shulman's choice allows white to keep the gambit pawn at the cost of awkward piece placement.] 8...Qxf4 9.dxc7 Nc6 10.a3 [10.Nd3 Qh4+ 11.g3 Qe4 12.Rg1 Ba5 and black has good compensation.] 10...Ba5 11.g3 Qe3 12.Bg2 0-0 [12...Nd4!? could be even stronger: 13.b4 Bxc7 and white has trouble castling.] 13.b4 Bxc7 14.Bxc6 White reluctantly parts with his light-squared bishop, leaving the light squares on the kingside weakened. [Unfortunately, this was his only choice, since 14.Qb3?! Nd4! 15.Qxe3 Nc2+ 16.Kf1 Nxe3+ 17.Kg1 a5 18.b5 Bb6 gives black more than enough compensation.] 14...bxc6 15.Qb3 Qh6! After a long think I decided that this was the best square for the queen. It supports the advance of the f-pawn

and temporarily prevents white from castling.

**16.Rd1 f5 17.Nf3 f4 18.g4** Blockading the kingside is white's best option, although his knights are reduced to a defensive role.

**18...Be6** Now my plan is to play against the weak e-pawn and maybe put a rook on e3. [It was also possible to immediately play 18...Re8 but white can give the pawn back for activity. 19.0-0 Rxe2 20.c5+ Be6 21.Qa4 leads to unclear play.] **19.0-0 Rae8**

**20.Kh1?!** I think that the king stood better on g1. On h1, it is exposed on the dangerous h1-a8 diagonal, and it no longer protects the knight on f2. This will become important when black gets a rook to the second rank.

**20...Bc8 21.Qa4** White targets the a7-pawn. Although this plan loses a lot of time, it is hard to suggest another active plan.

[Passively defending the e-pawn is not a good idea. 21.Rd2 Re3 22.Qb2 Rfe8 23.Rfd1 Qe6 and black's pressure becomes nearly unbearable.] **21...c5! 22.bxc5**

[22.Qxa7!? looks greedy, but it does have a tactical point. 22...Bb6 23.Qa8! Rxe2 24.bxc5 and black cannot recapture because of the fork on d5. Therefore 24...Bc7 25.Qd5+ Kh8 26.Rde1 gives white chances of surviving.] **22...Rxe2 23.Rd5!?**

The point of this move is to sacrifice the exchange if black plays Bb7. This move allows the sacrifice on g4, but white had a creative defense that both players missed.

**23...Bxg4! 24.Nxg4 Qh3 25.Rf2?** [25.Nh6+!! is a great counter-sacrifice that might have saved white the game. In all variations, it looks like white is hanging on by a thread. 25...Kh8 (25...gxh6 26.Rg1+ Kh8 27.Rd3! Rxh2+ (27...Rg8 28.Qd1 Reg2 29.Qa1+ R8g7 30.Rd2! Rxg1+ 31.Nxg1 and white escapes.) 28.Nxh2 Qxd3 29.Qc6 and Black is certainly better, but the fight is far from over. White has serious drawing chances, especially if he can get the queens off.) 26.Nf7+! Rxf7 Now white can use black's weak back rank. 27.Rf2 Rfe7 28.Qd1! R2e3 This is black's best try, but he doesn't yet have anything decisive.] **25...Rxf2 26.Nxf2 Qf1+ 27.Ng1**

**27...Qxf2?** I could have finished the game much faster if I had played the combination in the right order. [27...f3! 28.Rg5 Qxf2-+] **28.Qd7 f3 29.Qe6+ Kh8 30.Qh3 h6 31.Rd3 Bxh2!** This sends the game into an ending that is easily winning for black. **32.Rd1**

[32.Qxh2 Qxh2+ 33.Kxh2 f2-+; 32.Nxf3 Rxf3 33.Rxf3 Qg1#] **32...Bxg1 33.Rxg1 Qxc5 34.Qg4 Qe7 35.a4 f2 36.Rf1 Qb7+ 37.Kh2 Qc7+ 38.Kh3**

**38...Qf4** [38...Rf4 39.Qg3 Qf7 wins immediately. But with only a few minutes left before time control on move 40, I wanted the winning rook and pawn ending.] **39.Qxf4 Rxf4 40.c5 Rc4 41.Rxf2 Rxc5 42.Rf7 Ra5 43.Rf4 Kh7 44.Rc4** The rest was fairly simple. **44...h5 45.Kh4 Kh6 46.Rc6+ g6 47.Rc4 Rd5 48.Kg3 Rd3+ 49.Kf2 Ra3 50.Kg2 Kg5 51.Rc5+ Kf4 52.Rc4+ Ke3 53.Kh2 g5 54.Kh3 Kf2+ 55.Kh2 g4 56.Rf4+ Rf3 0-1**

*"I'd love to play chess, but my back is still sore from yesterday's game."*

# ANOTHER GAME FROM THE KC MASTERS INVITATIONAL

by Michael Brooks, e-mail: IMMichaelBrooks@aol.com

Levitan, Yuliya (2237) -  
Steiner, Tim (2057) [B76], KC  
Masters Invitational, Round  
One, January 14, 2006

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6  
5.Nc3 g6 6.Be3 Bg7 7.f3 0-0 8.Qd2 Nc6  
9.0-0-0 d5 10.exd5 Nxd5 11.Nxc6 bxc6  
12.Bd4 Bxd4 13.Qxd4 Qc7 14.Bc4 Nxc3  
15.Qxc3 Qf4+ Diagram

This Queen check does not help Black and even leaves the d7 and e7 squares unguarded. Even with the better Bb7 followed by Rd8 Black's position looks worse. In fact, Black's game looks so defensive that I thought he must have misplayed his opening. After searching my database for 13...Qc7 14.Bc4... , it turns out that most of the games proceed with 14... Nb6 and not 14... Nxc3 16.Kb1 Rb8 17.h4 Also good is 17.Rh-e1 Rb7 18.g3... 17...h6 18.g3 Qf6 19.Qxf6 exf6 It looks like White has a won game at this point 20.Rd6 Diagram

Better was Rh-e1 ... White's advantage is the control of the center and a better pawn structure. The threats to penetrate into Black's position will not go away. 20...Kg7 21.Rxc6 Again, the simple Re1 with the threat of Re7 and Rxc6. 21...Bb7 22.Rd6 This is not a bad move, but simpler would be 22.Rc7.... If then, A) 22... Rf-c8 23.Rxb7 Rxb7 24.Ba6 or B) 22... Rb-c8 23.Rc8 Rc8 24.Be2 or C) 22...Bxf3 23.Re1 Rb-c8 24.Re-e7 Rxc7 25.Rxc7.

22...Bxf3 23.Rf1 Rbe8 Black has been in trouble since the opening, but White's eagerness to win material has offered Black some chances at counter-play. 24.b3 Diagram

Again not a bad move, but Kc1 would have been better. For example 24.Kc1 Re3 25 Kd2 Rf-e8 and now either Rf2, Ra6 or Rd7

24...Re3 25.Ra6 Even now Kc1 with play similar to the line already given. 25...f5 26.Rxa7 Kb2 would keep Black's rook off the c3

square. 26...Be4 Suddenly, Black has strong counter play. Both Rxc3 and Rc3 are threatened. 27.Rd1 White decides to counter attack Black's f7 pawn. Safer might be 27.Rg1 Rc3 28.Bd3, returning a pawn 28.... Bxd3 29.cxd3

Rxd3 30.Rc7 27...Rxc3 28.Rdd7 g5 It is not how many passed pawns you have, but how fast they are. Black might be winning at this point because his pawns are faster, and his pieces are better positioned to support both his advancing pawns while restraining White's

pawns. 29.h5 29.hxg hxg 30 Bxf7 Kf6 31. Bd5 trading Black's powerful bishop offered better chances of saving this game. 29...Kf6 30.Bxf7

g4 31.Rac7 Rg1+ 32.Kb2 g3 33.Rd6+ Ke5 34.Re6+ Kf4 35.Rg6 g2 36.Bc4 Rd1 Black missed his chance to win this game quickly at this point with Bf3 37.Rcg7 Bf3 Possibly Rg1 was still better with Bf3 and Bg4 to follow.

38.Rxc2 Bxc2 39.Rxc2 Rh1 40.Be2 Ke3 41.a4 f4 42.a5 f3 43.Bxf3 Kxf3 44.Rg6

Rxh5 45.b4 My guess is that Black is winning at this point, but I am not going to get into the lines. Have fun with your Fritz program. 45...Rb8 46.Ka3 Rhb5 47.c3 h5 48.Rh6 Kg4 49.Ka4 R5b7 50.Rg6+ Kf5 51.Rg1 h4 52.a6 Ra7 53.b5 h3 54.Ka5 Ke4 55.b6 Raa8 56.a7 Rh8 57.Ka6 Diagram

I did not witness this game and do not know if time was a factor, but even at this point, Black is not losing. (Editor's Note; Steiner was in time pressure.) For example 57...Kf3 58.b7 Rh6+ 59.Kb5 Rh5+ Driving the king two squares away from the a7 pawn. 60 Kb4 Rh-h8 61.bxa8 Rxa8 62.Ra1 h2 1-0

# UMR CHESS CHAMPIONSHIP - PART TWO

by Selden Trimble

Jacob Hamacher - Bryan Brenner  
UMR Spring Championship Havener  
Center, UMR, Rolla, February 25th, 2006

This endgame occurred in the 3rd round of the UMR Spring Championship. The winner went on to win the tournament. It's an instructive game because it shows the necessity of not trying to do too much in a delicate position. There are three important features of this position. The material is scarce but even. Bishops of opposite color are the only pieces left. Black has a pawn that is one square from queening. The first feature means that variations must be calculated very accurately, because there is little chance of recovery if an error is made. The second means that the position may be drawn, even if a material imbalance occurs. The third means that Black probably has the initiative. **1...Bf4 Diagram**

Perhaps not the best, but it doesn't hurt Black's position any. White's bishop is stuck guarding the b1-square. To make progress, Black is going to have to move

his king to c1, queen his b-pawn, and force White to sacrifice the White bishop for the Queen. Also, Black must prevent White from eliminating Black's e-pawn. White has his own ambitions. His g-pawn is passed. He'd like to force Black to sacrifice the Black bishop for this pawn. Then White might be able to capture Black's e-pawn and queen his f-pawn. In fact, if Black's king really does head for c1, White can probably accomplish this.

**2.Kh5?** This doesn't lose, but it's not so good. **2. Be4** would have been much better. First, this allows White's g-pawn to advance. Second, if **2. ... Kd4**, then **3. Kf5** might actually win for White. **2...Kd4**  
**3.Bb1** Why not **3. Be4**? **3...Ke3** **4.Be4**  
Now Black has an easy draw. **4. ... Bxg5**  
**5. Kxg5** **b1(Q)** **6. Bxb1** **Kxf3**. But Black wants more. **4...Kd2** **5.g6** Notice how nice things would be for White if his king were on f5. **5...Be5** **6.f4?** There is no reason to think that Black will be so stupid as to play **6. ... Bxf4??**. Further, there is no reason to disturb the the mutually protective positions that the White bishop and f-pawn have. On e4 and f3, they are unassailable by Black. Instead, White should play **6. Kh6**. If then **6. ... Kc1**, White can continue **7. g7** **Bxg7** **8. Kxg7** **b1(Q)** **9. Bxb1** **Kxb1** **10. f4** **Kc2** **11. f5** **Kd3** **12. Kf7** **Ke4** and it is Black that barely holds the

draw. 6...Bf6 7.Kh6?? This loses the game for White. White must be able to capture Black's e-pawn. So, 7. Kg4 Kc1 8. Kf5 b1(Q) 9. Bxb1 Kxb1 10. Ke6 Kc2 11. g7 Bxg7 12. Kxe7 draws. 7...Ke3! Black is in no hurry to queen the b-pawn. White cannot attack it where it stands. 8.Bb1 Kxf4 9.g7 Bxg7+ 10.Kxg7 e5! White's bishop cannot stop both pawns by itself, and White's king is too far away to help. 11.Kf6 e4 12.Ke6 e3 13.Bd3 e2 13. Kf3 would have been more efficient, but it really doesn't matter. 14.Bxe2 b1Q  
**Diagram**

White resigned in a few more moves. 0-1

**Marler, Alex - Pollit [B07]**  
(Annotation by Tony Rich)

1.e4 d6 2.d4 Nf6 3.Nc3 g6 4.Bg5 Bg7 5.Qe2 0-0  
 6.0-0 Re8 7.f4 [7.e5 may not be as objectively  
 good, but it is very tricky for Black to maneuver.  
 7...Nfd7 8.e6 fxe6 9.Qxe6+ Kh8 10.h4 Nf6 (10...c5  
 probably works, too, but Black has to be very precise.  
 11.h5 cxd4 12.hxg6 Nf8 13.Qf7 Be6 (13...dxc3  
 14.Bh6 cxb2+ 15.Kb1 Ne6 16.Bxg7+ Nxg7 17.Rxh7#)  
 ) 11.Qe3] 7...Nfd7 8.f5 [White could also play a little  
 more positionally with 8.Nf3 and the position is very  
 akin to an Austrian Attack] 8...Nf8 [8...c5 or some-  
 thing like it was in order. Black needs to get some  
 counterplay going or face certain death] 9.h4 gxf5  
 10.exf5 Bxf5 11.g4 Bd7 12.Qf3 Qc8 13.Bc4 Be6  
 14.Bxe6 Nxe6 15.Nge2 c6 again, too slow, but it is  
 hard to suggest something. Black needs to unravel  
 his queenside now. [15...c5 at least tries to create  
 some play, but it will be a few moves before the  
 knight on b8 becomes active, and the a8-Rook is  
 dead wood.] 16.Rdf1 f6 17.Be3 d5 18.g5 Rf8

19.Qg4 Nc7 20.Qg3 Ne8 [20...Nd7 is a try, but I don't  
 think anything works here] 21.Rhg1 [21.h5 looks a lit-  
 tle better - I'd wait to decide on the h1-Rook until  
 Black commits to a kingside structure; the rook may  
 be best on h1.] 21...f5 22.h5 Nd7 23.h6 Bh8 24.g6  
 the attack plays itself 24...Bf6 25.Nf4 [25.gxh7+ ends  
 it quicker 25...Kxh7 (25...Kh8 26.Qg8+ Rxg8  
 27.hxg8Q#) 26.Qg6+ Kh8 27.Rxf5 and all resistance  
 is over. For example: 27...b6 28.h7 Ng7 29.Rxf6]  
 25...e5 26.gxh7+ Kxh7 27.Qg6+ Kh8 28.Ne6 Nd6  
 29.Bg5 [Fritz found this cool mate: 29.Qg7+ Bxg7  
 30.hxg7+ Kh7 (30...Kg8 31.gxf8Q+ Kh7 32.Qg7#)  
 31.Rf2! Rf6 32.g8Q+ Qxg8 33.Rh2+ Rh6 34.Rxh6#]  
 29...Rf7 30.dxe5 Bxe5 31.Bd8 Qxd8 32.Nxd8 Rxd8  
 1-0

**Huff, Daniel (2012) - Swinger, Nathan (1810) [B20],  
 Missouri Class Championships Columbia, MO (1),  
 10.06.2006**
